FAMILY READY / PRINTABLE PLANNING SHEET

Emergency kit expiry tracker

Copy the label wording and date. Record what needs checking or replacing.

A date record is not a safety assessment. Follow the product instructions.

Kit / storage location: _____ **Checked on:** _____

Item / quantity	Label wording	Date on label	Action / owner / due date

Next review: _____ **Review with:** _____

Use the date exactly as labelled. Keep "best before", "expiry" and your own review dates distinct.

No date shown? Write "not shown" and check the product instructions instead of inventing one.

If an item or date is unclear, record a question for the manufacturer or appropriate professional.

Store completed sheets appropriately. You do not need to include private medical details here.

Keep the kit list with the household plan.

Family Ready lists a free editable kit checklist. This sheet does not scan labels or schedule reminders.

Publisher-created worksheet. Preparation only; not a complete emergency supply list.
