ASTERFOLD / PHOTOGRAPHY FIELD SHEET

Sunset exposure comparison

Choose one part of the scene you want to keep visible.

From one position, take a reference photo and a darker one. Add a lighter frame if useful. Keep the subject, framing and focus point the same. Work close together in time.

Scene or frame edge to match _____

Detail you want to preserve _____

FRAME	FILE / SETTING	BRIGHT SKY DETAIL	DARK SUBJECT DETAIL
Reference			
Darker			
Lighter (optional)			

Which frame would you keep?

Circle one: reference / darker / lighter / none yet

What can you see in the keeper that the other frame lost?

One change to try on the next visit

Worked example

The darker frame kept the pink cloud edge but lost the bark texture. Keep it for a silhouette; try a different framing next time if the tree detail matters more.

Honest Little Apps

Use the sheet on its own. Asterfold can help plan a return visit and record observations.
